Material Costs:	40%
Contractor Fees:	30%

OVER 96% SR&ED CLAIM SUCCESS

WHAT WE DO

We help innovative companies apply for Scientific Research & Experimental Development Tax Credits, as well as other government funding programs.

With over 15 years of experience dealing with the CRA, and over 500 SR&ED projects, we've helped our clients recoup more than \$50,000,000 in tax credits.

WHY ENGINEVA?

Our vast experience handling SR&ED claims across many industries and our good standing with government auditors ensure the highest chance of success for your claim.

We also offer a free risk-assessment and SWOT analysis to determine eligibility and anticipated cost recovery.

LESS RED TAPE. MORE REFUND.

QUICK SR&ED ELIGIBILITY CHECKLIST

- Are you creating new (or improving existing) materials, devices, products, or processes?
- Do you have technical people on staff (such as engineers, software developers, scientists, technicians, etc.)?
- Did your technical project generate any new knowledge, intellectual property, or patents?

If you answered "yes" to any of the above, you may be eligible for SR&ED credits.
Keep reading to find out how to get started!

HOW MUCH DOES IT COST?

Our fees are derived from a percentage-based formula ranging from 15-20% of your total refund, depending on your risk assessment. Our clients only pay when their claim is successful.

HOW DO I GET STARTED?

We start with a free risk-assessment report to determine your eligibility under the SR&ED tax credit program. This report also outlines the expected SR&ED tax credits and refunds from the CRA so that you can make an informed decision on how best to move forward.

Contact us today to get started risk-free and let us show you how Engineva can become one of your most important partners.
